

Failure finding list

In case of a malfunction of a product please complete the failure finding list and attach it to the product.
An incomplete failure check list may lead to delays in the repair process.

Order details

Customer / Company				
Date				
Name of technician				
SW Service-Order-No				
Serial-No of NEW rotary axis				
Machine-No				
Side of table	C	V	A	U

Product data

Serial number		
Machine operating hours		
Product operating hours		
Customer's shift operation	1 / shift 3 / shift	2 / shift 3+ / shift
Initial start-up of product	at facility (OEM) at customer date	
date		

Please check the applicable failure descriptions

Collision	yes	no
Transport damage	yes	no
Electrics and connections motor breakdown power connection / cable carrier damaged	Sensor an monitoring system speed and position encoder signal failure temperature monitoring of motor defective	
Clamping clamping defective / function restricted clamping leakage	Geometry radial runout failure axial play axial offset positioning failure	
Cooling coolant leakage motor overheating
